To Whom It May Concern:

I know Zachary Lankford thru our work relationship in the prevention of rabies. We worked together in quarantining, and releasing animals. Zack was always prompt in reporting new cases to the Health Department. In addition, he asked many questions about state laws concerning proper procedures in dealing with animal bites. Zack always wanted to stay abreast of current laws and regulations in an effort to do his job more satisfactory.

Therefore, I believe Zack will be a dependable and conscientious employee.

Respectfully,

A handwritten signature in cursive script that reads "Barry L. Franklin".
